LG G Watch Spring Bar Pin Replacement

Replace the spring bar pins.

Written By: Geoff Wacker

INTRODUCTION

Use this guide to replace the spring bar pins on your LG G Watch.

TOOLS:

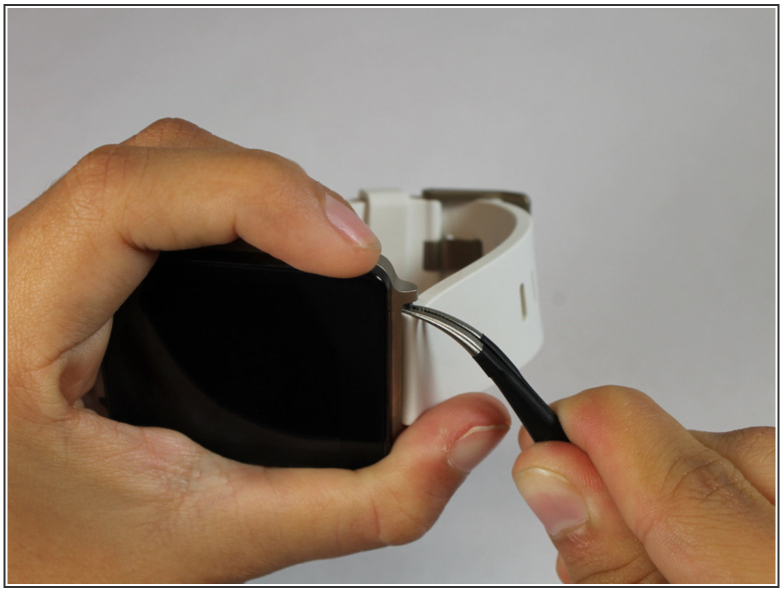

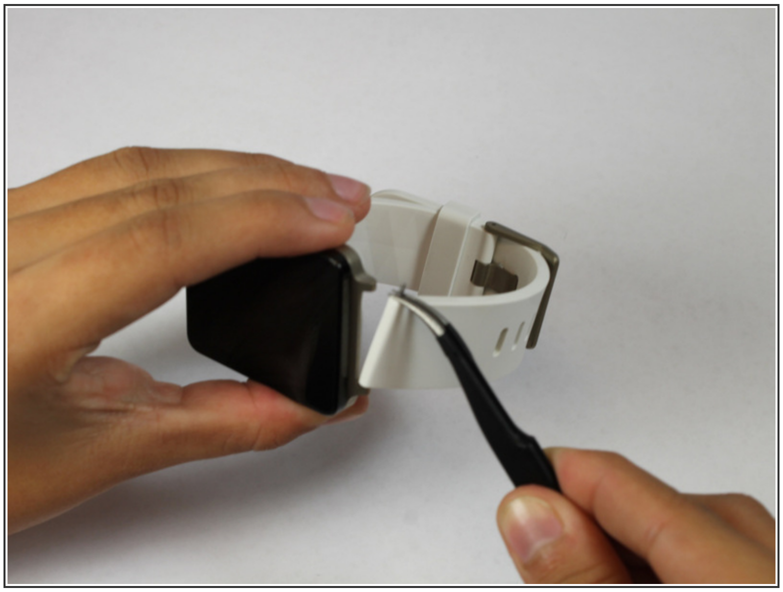

- Tweezers (1)

Step 1 — Wristband

- ⓘ Spring bars attach the two halves of the wristband to the watch body. The spring bar has a shoulder on either end.
- ⓘ Be prepared to apply some pressure with your fingers to perform the following action.
- First, slide the wristband down on the spring bar to expose the shoulder of the spring bar.
- Grasp the exposed shoulder with the tweezers to perform the next step.

Step 2

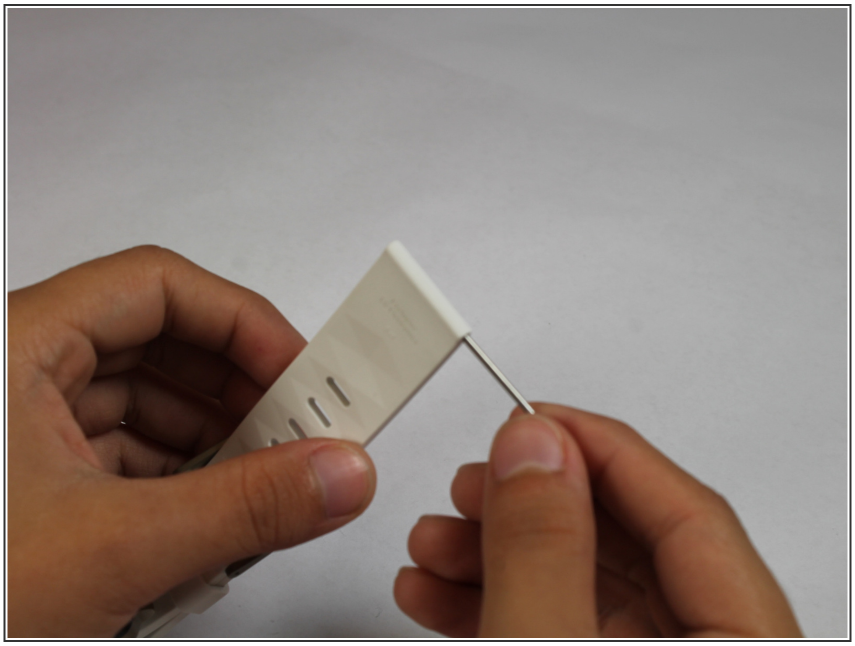

⚠ This is a challenging step. Do it carefully to prevent the spring bar from flying out of the wristband.

- Use the tweezer to depress the spring bar so that it collapses by a few millimeters and pops out of the hole that was holding it in place.
- Now carefully pull the other end of the spring bar to detach the wristband from the watch face.

Repeat steps 1 and 2 for the other wristband.

Step 3 — Spring Bar Pin

- Slide the spring bar pin out of the wristband.
- Repeat this step for the other wristband.

To reassemble your device, follow these instructions in reverse order.
